Project Name	Global AI with Education
Maximum Marks	5 Marks

Activity 1: Interactive and visually appealing dashboard

The dashboard titled “Global AI Adoption in Education Dashboard” presents AI adoption and education-related trends using multiple visualizations.

- **Clear and Intuitive Layout:** The dashboard combines KPI-style values, a geographic view, a regional comparison chart, and a time-trend chart.
- **Use Appropriate Visualizations:** Maps are used for geographic trends, a donut chart compares regional adoption, and a line chart shows the adoption journey over time.
- **Colour and Theming:** Different regions are distinguished using separate colours in the regional visualizations.
- **Interactive Filters and Slicers:** The dashboard contains fields/controls intended to support filtering and exploration of the displayed data.
- **Drill-Down Capabilities:** The regional and geographic views can be used to examine education/AI adoption information at a more detailed level where the underlying Tableau fields permit it.
- **Responsive Design:** The dashboard is arranged as a single view containing several visual components; the final Tableau Public view should be checked on different screen sizes.
- **Custom Visuals and Icons:** The dashboard uses a combination of charts, map-based visuals, and KPI-style summaries.
- **Use of Infographics:** The donut chart and summary figures provide quick visual understanding of regional AI adoption.

Dashboard Preview

Major Outcomes from the Dashboard

- The dashboard shows a total count of 1,360 in the main summary visual.
- The regional comparison donut chart displays closely grouped shares for South America, Asia, North America, Europe and other regions; the visible labels are around 29% for several regions.
- The geographic visual highlights educational-development trends across multiple locations.
- The dashboard includes an AI Adoption Journey time-series view covering approximately 2016–2026.

- The dashboard includes summary measures related to daily AI usage and school AI adoption, allowing regional/overall comparison.

Activity 2

Publish Dashboard on Tableau Public and paste the Dashboard Public link below:

Dashboard Public Link: _____

Note: The supplied screenshot shows the Tableau Public profile/dashboard view, but it does not expose a complete public dashboard URL. Therefore, the final Tableau Public link has not been invented here.
